The guest speaker tonight was Dynamic: Wes Hall. He spoke of what is real in our classroom... info that can be taken back to our classroom the next day. He spoke about how to build a positive, safe & trusting learning environment day one. Once the relationship was built the student will let their guards down open up to learn. He brought to light that a person with the most information will attract money to them. However, the person without or with the least amount of information will always be chasing money for their life. All in all building education in a child will allow a child to open up & learn all that they can & live a Great life.

Wes presented with a very powerful tone to inform me of ways to reach my students. I must first look inside at my own and how my students view me. I must gain their trust from the beginning because young people listen to a smaller percentage of words and respond most to body language and tone. A student who is beyond consequences biggest fear is being removed from the atmosphere of love. 2 In class, we need to care, understand, and provide certainty to our students. 3 Modify behavior by looking at yourself. 4 The brain stops when a habit forms. 5 If you are breathing, you are communicating. 6 7% of how people hear/understand you is through your words + 93% is through your tone + body language. 7 Teachers earn the right to teach. →
